## News from the Principal

We have had the usual busy start to the term and matters have settled down (or are settling down) as the routines for the new academic year are established. Much work was completed during the summer vacation and the new room at the top of the building was completed and presents a large and exciting space for us to use. The heavy work for the new courtyard extension has been completed and the project will now begin to focus on its interior with a completion date of the end of this calendar year.

We were very pleased with our IB Diploma results in July and with our students' achievements in gaining places at university. Further details of university places gained are shown by Paul Morris below.

We have welcomed a number of new staff to the school and those whose focus is mostly or completely on courses at the college include:

**Jeffrey Mayo** (Economics and Humanities) who is originally from Canada but has spent a number of years teaching in various parts of the world – latterly at the United World College in Wales (one of the founding institutions of the IB Diploma).

**El Kahina Meziane** (Biology and Science) joins us from Cambridge where she was engaged in both postdoctoral research and a variety of teaching posts. El Kahina is originally from Algeria where she also gained experience as a teacher of science.

We trust that all new and returning students have also settled in well and if there are any queries, please do not hesitate to contact us at the College.

**Huw Davies**

Principal - Diploma College
